

URGENT ALERT – YOUR WATER MAINS STOPCOCKS.

It won't have escaped your notice that "Gigaclear" has been busy installing fibre optic cables in Hampstead Norreys, which is great news.....

HOWEVER, some of their contractors seems to have been slapdash in their workmanship with the result that the access to some households' "Water Mains stopcocks", which are situated on the road or pavement outside their boundary, have been blocked with tarmac before having the inspection manhole replaced in its rightful location!!!

It would therefore be prudent for all household to lift the lid of the manhole to their property's water mains stop-cock to check whether they can still access it !!!

If you find that you can no longer access your Water Mains stopcock due to it having been capped with soil or tarmac you should contact "Gigaclear" as a matter of urgency on

01865 591 131 or 01865 591 100

whilst their contractors are still in the village, and demand that the blockage be removed right away.

Hampstead Norreys Parish Partnership.
